>PROJECT WORK

National Park Service Guide | Student Software Engineer | [Live URL](#) | [Code URL](#)

Aug 2020 - Sept 2020

Web application where users can view available activities at given National Park and save them to a bucket list.

- Designed full stack web application server with Python and Flask deployed using AWS Lightsail
 - Built using Python, Flask, SQLAlchemy, PostgreSQL, HTML, JavaScript, jQuery, Jinja, CSS, and Bootstrap
 - Utilized National Park Service API to retrieve park data
 - Developed UI using JavaScript, jQuery, Jinja2, HTML5, CSS3, deploying platform on AWS EC2
-

Connect 4 | Prep Student | [Code URL](#)

Jan 2020 - Feb 2020

Two-player Connect 4 game as my first coding project.

- Designed two player Connect 4 game using Object Oriented Programming(OOP)
 - Built in Python using Repl.it IDE
-

>PROFESSIONAL EXPERIENCE

KeepTruckin | Technical Sourcing Specialist | San Francisco, CA

Oct 2018 - Feb 2020

- Collaborated with 20 + engineers on needs of role, interview strategies, and to build pipeline
- Independently owned six SWE roles where I supported candidates from source to hire
- Conducted daily phone interviews with 100+ engineering candidates to discuss desired role

KeepTruckin | Recruiting Coordinator | San Francisco, CA

Jan 2018 - Oct 2018

- Developed candidate experience as first Recruiting Coordinator hired
- Scheduled number of phone, video, and onsite interviews at our San Francisco, Buffalo, and Nashville offices
- Utilized Lever ATS and later Greenhouse ATS to track requisitions and candidate progress

BBDO SF | Facilities Coordinator | San Francisco, CA

May 2017 - Dec 2017

- Scheduled interviews and meetings for human resources and business admin team
 - Ordered inventory for office and organized company wide outings
-
